## **Management Commentary**

“Our first quarter performance marked a strong start to 2022. Demand for our high-quality EV products was robust and our proprietary suite of technologies continue to lead the industry,” said Mr. He Xiaopeng, Chairman and CEO of XPeng. “Superior in-house technology development capability and proactive supply chain management enabled us to address supply chain challenges more efficiently. We remain confident in expanding our market share despite the impact of semi-conductor shortage and COVID-19.”

“Our strategic goal is to make advanced driver-assistant system (“ADAS”) more affordable and available to broader customers. We therefore resolve to develop full-scenario ADAS with optimized strong performance and a high level of safety at affordable cost, aiming to create greater value for our customers and shareholders.” concluded Mr. He.

“We are pleased to begin the year with a strong quarter. Our total revenues grew rapidly by 152.6% year-over-year in the first quarter of 2022 and our gross margin held up well,” said Dr. Hongdi Brian Gu, Honorary Vice Chairman and President of XPeng. “We will continue to manage supply chain uncertainties and we remain confident in our exciting product pipeline planned for 2022 and beyond. In addition, we expect to further leverage our economies of scale and continue to improve our operating efficiency.”

## **Recent Developments**

### **Deliveries in April 2022**

- Total deliveries reached 9,002 vehicles in April 2022, representing a 75% increase year-over-year. The deliveries consisted of 3,714 P7 smart sports sedans, 3,564 P5 smart family sedans and 1,724 G3 and G3i compact smart SUVs.
- As of April 30, 2022, year-to-date total deliveries reached 43,563, representing a 136% increase year-over-year.

## **Unaudited Financial Results for the Three Months Ended March 31, 2022**

**Total revenues** were RMB7,454.9 million (US\$1,176.0 million) for the first quarter of 2022, representing an increase of 152.6% from RMB2,950.9 million for the same period of 2021 and a decrease of 12.9% from RMB8,556.0 million for the fourth quarter of 2021.

*Revenues from vehicle sales* were RMB6,998.8 million (US\$1,104.0 million) for the first quarter of 2022, representing an increase of 149.0% from RMB2,810.3 million for the same period of 2021 and a decrease of 14.5% from RMB8,187.2 million for the fourth quarter of 2021. The year-over-year increase was mainly attributable to higher vehicle deliveries, especially for the P7 and P5, while the quarter-over-quarter decrease was associated with less vehicle deliveries affected by seasonal factors related to the Chinese New Year holiday.

*Revenues from services and others* were RMB456.1 million (US\$72.0 million) for the first quarter of 2022, representing an increase of 224.5% from RMB140.6 million for the same period of 2021 and an increase of 23.7% from RMB368.8 million for the fourth quarter of 2021. The year-over-year and the quarter-over-quarter increases were mainly attributed to more service, parts and accessory sales in line with higher accumulated vehicle sales.

**Cost of sales** was RMB6,544.2 million (US\$1,032.3 million) for the first quarter of 2022, representing an increase of 149.7% from RMB2,621.1 million for the same period of 2021 and a decrease of 13.1% from RMB7,532.7 million for the fourth quarter of 2021. The year-over-year and the quarter-over-quarter changes were mainly in line with vehicle deliveries as described above.

**Gross margin** was 12.2% for the first quarter of 2022, compared with 11.2% and 12.0% for the first quarter of 2021 and the fourth quarter of 2021, respectively.

**Vehicle margin** was 10.4% for the first quarter of 2022, compared with 10.1% for the same period of 2021 and 10.9% for the fourth quarter of 2021. The quarter-over-quarter decrease was primarily attributable to increase in raw material costs.

**Research and development expenses** were RMB1,221.3 million (US\$192.7 million) for the first quarter of 2022, representing an increase of 128.2% from RMB535.1 million for the same period of 2021 and a decrease of 15.9% from RMB1,451.4 million for the fourth quarter of 2021. The year-over-year increase was mainly due to (i) the increase in employee compensation as a result of expanded research and development staff, and (ii) higher expenses relating to the development of new vehicles models to support future growth. The quarter-over-quarter decrease was mainly explained by less design and development expenses which were affected by seasonal factors related to the Chinese New Year holiday.

**Selling, general and administrative expenses** were RMB1,641.6 million (US\$259.0 million) for the first quarter of 2022, representing an increase of 127.7% from RMB720.8 million for the same period of 2021 and a decrease of 18.5% from RMB2,015.4 million for the fourth quarter of 2021. The year-over-year increase was mainly due to (i) higher marketing, promotional and advertising expenses to support vehicle sales, and (ii) the expansion of our sales network and associated personnel cost, and commission for franchised store sales. The quarter-over-quarter decrease was mainly associated with seasonal factors mentioned above.

**Loss from operations** was RMB1,920.5 million (US\$302.9 million) for the first quarter of 2022, compared with RMB903.9 million for the same period of 2021 and RMB2,429.7 million for the fourth quarter of 2021. The lower quarter-over-quarter loss was mainly attributable to less operating expenses.

**Non-GAAP loss from operations**, which excludes share-based compensation expenses, was RMB1,747.9 million (US\$275.7 million) for the first quarter of 2022, compared with RMB813.7 million for the same period of 2021 and RMB2,340.8 million for the fourth quarter of 2021.

**Net loss** was RMB1,700.8 million (US\$268.3 million) for the first quarter of 2022, compared with RMB786.6 million for the same period of 2021 and RMB1,287.2 million for the fourth quarter of 2021.

**Non-GAAP net loss**, which excludes share-based compensation expenses, was RMB1,528.2 million (US\$241.1 million) for the first quarter of 2022, compared with RMB696.3 million for the same period of 2021 and RMB1,198.3 million for the fourth quarter of 2021.

**Net loss attributable to ordinary shareholders of XPeng** was RMB1,700.8 million (US\$268.3 million) for the first quarter of 2022, compared with RMB786.6 million for the same period of 2021 and RMB1,287.2 million for the fourth quarter of 2021.

**Non-GAAP net loss attributable to ordinary shareholders of XPeng**, which excludes share-based compensation expenses, was RMB1,528.2 million (US\$241.1 million) for the first quarter of 2022, compared with RMB696.3 million for the same period of 2021 and RMB1,198.3 million for the fourth quarter of 2021.

**Basic and diluted net loss per ADS** were both RMB2.00 (US\$0.32) for the first quarter of 2022, compared with RMB0.99 for the first quarter of 2021 and RMB1.51 for the fourth quarter of 2021.

**Non-GAAP basic and diluted net loss per ADS** were both RMB1.80 (US\$0.28) for the first quarter of 2022, compared with RMB0.88 for the first quarter of 2021 and RMB1.41 for the fourth quarter of 2021.

### **Balance Sheets**

As of March 31, 2022, the Company had cash and cash equivalents, restricted cash, short-term deposits, short-term investments and long-term deposits of RMB41,714.0 million (US\$6,580.2 million), compared with RMB43,543.9 million as of December 31, 2021.

### **Business Outlook**

For the second quarter of 2022, the Company expects:

- **Deliveries of vehicles** to be between 31,000 and 34,000, representing a year-over-year increase of approximately 78.2% to 95.4%.
- **Total revenues** to be between RMB6.8 billion and RMB7.5 billion, representing a year-over-year increase of approximately 80.8% to 99.4%.

The above outlook is based on the current market conditions and reflects the Company's preliminary estimates of market and operating conditions, and customer demand, which are all subject to change.

## **Use of Non-GAAP Financial Measures**

The Company uses non-GAAP measures, such as non-GAAP loss from operations, non-GAAP net loss, non-GAAP net loss attributable to ordinary shareholders, non-GAAP basic loss per weighted average number of ordinary shares and non-GAAP basic loss per ADS, in evaluating its operating results and for financial and operational decision-making purposes. By excluding the impact of share-based compensation expenses, the Company believes that the non-GAAP financial measures help identify underlying trends in its business and enhance the overall understanding of the Company's past performance and future prospects. The Company also believes that the non-GAAP financial measures allow for greater visibility with respect to key metrics used by the Company's management in its financial and operational decision-making. The non-GAAP financial measures are not presented in accordance with U.S. GAAP and may be different from non-GAAP methods of accounting and reporting used by other companies. The non-GAAP financial measures have limitations as analytical tools and when assessing the Company's operating performance, investors should not consider them in isolation, or as a substitute for net loss or other consolidated statements of comprehensive loss data prepared in accordance with U.S. GAAP. The Company encourages investors and others to review its financial information in its entirety and not rely on a single financial measure. The Company mitigates these limitations by reconciling the non-GAAP financial measures to the most comparable U.S. GAAP performance measures, all of which should be considered when evaluating the Company's performance.

For more information on the non-GAAP financial measures, please see the table captioned "Unaudited Reconciliations of GAAP and non-GAAP Results" set forth in this announcement.
